

INSTRUCTIONS FOR THE BOOKING ENGINE INTEGRATION (POST)

1. Code to integrate booking engine must be as follows:

```
<form action="https://fhrvdang.backhotelite.com/en/v4/search-dispo.htm" method="post">

<input type="text" name="entrada" />
<input type="text" name="salida" />
<input name="adultos" id="id_adultos" value="2">
<input name="ninos" id="id_ninos" value="3">
<input name="edades" id="id_edades" value="4;0;0">
<input type="text" name="codpromo" />
<input type="hidden" name="sort_occupancy" />
<button>Buscar</button>
</form>
```

Parameters to send Roiback as POST:

- entrada** (required): Check In Date
- salida** (required): Check Out Date
- id_adultos** (required): Adults
- id_ninos** (required): Children
- id_edades** (required): Age
- codpromo** (optional): Promotional code
- sort_occupancy** (optional): True or False (Allows to order the search by occupancy)

Date format for entrada/salida (check-in/check-out) must be dd/mm/yyyy

Action attribute (`action`) must be in the following way in every language:

EN: <https://fhrvdang.backhotelite.com/en/bookcore/v4/search-dispo.htm>

Method attribute(**method**) must always be **POST**

2. Please insert the following script on all web pages to measure sales in Adwords CRS, email, Criteo, Affilired etc.

```
<script type="text/javascript">(function(){function get(name){var result=null,tmp=[],items=location.search.substr(1).split("&");for(var index=0;index<items.length;index+=1){tmp=items[index].split("=");if(tmp[0]===nombre){result=decodeURIComponent(tmp[1])}}return result}var partner=get("partner");if(partner){var a=document.createElement("script");a.type="text/javascript";a.async=!0;a.src="https://fhrvdang.backhotelite.com/partner/?partner="+socio;varb=document.getElementsByTagName("script")[0];b.parentNode.insertBefore(a,b)}});</script>
```

The following deeplink can be used for the **BOOK** buttons you have on the website for the hotel:

<https://fhrvdang.backhotelite.com/en/bookcore/availability/tomorrow/fhrvdang>
